

Grid+ to support the development of the EEGI (2012-14)

- Providing the necessary **support to the EEGI**, in a structured and organised way
 - **Involving all stakeholders**, addressing costs, benefits, KPIs, financing and **knowledge sharing**
 - Ensuring a **rational, fluid and stable EEGI workflow**, as to reach the 2020 European goals
-
- Preparations and follow-up
 - Role at the meetings

Preparations and follow-up

- On the basis of the EEGI work plan and the outcome of the last meeting, **Grid+ will prepare input to the ECs draft agenda** for the upcoming EEGI meeting, one month in advance, indicating within which areas Grid+ can contribute
- This **should also be communicated** to the Grid+ advisory board – making a closer connection to the MS and other initiatives
- **Preparation and follow-up meetings** will be arranged in relation to the EEGI meetings – between the main representatives; EC, GRID+, ENTSO-E, EDSO and ETP
- Grid+ should prepare an **input to the ECs draft minutes** for the items where Grid+ has been active in the meeting

Role at the meetings

- On the draft agenda on Grid+
 - Presentation of **general development**, status and planning/timeline
 - On all major Grid+ areas, Grid+ will **develop draft decision documents/presentations** and propose speakers (interaction and agreement with the JRC in areas shared)
(all presentations, from projects and institutions working on these issues should be coordinated with the Grid+ before the meetings)
- For the GRID+ related items on the EEGI agenda, Grid+ will coordinate **whom from the project to take part** in the next EEGI meeting
- The Grid+ presentations are bringing forward **views from a Grid+ point of view** – all members of the EEGI (also of course the members of Grid+) can give any comments during the meetings
